GitHub: https://github.com/sadia712 Mobile: +91-8240906402

SKILLS

Languages: C++, Python, C, Java
Cloud Technologies: AWS (EC2, S3, IAM, VPC, CloudWatch), Docker, Linux, CI/CD Pipelines, IaC
Tools/Platforms: MySQL, Git, GitHub, HTML, CSS, MS Office
Soft Skills: Team Player, Project Management, Leadership, Adaptability

PROJECTS

Static Malware Analyzer | ***GitHub*** | May' 25- Jul' 25

- Developed a Python-based static analysis tool to detect malicious files by cross-referencing file hashes against a database of 1,000+ known malware signatures.
- Engineered automated hash computation using MD5, SHA-1, and SHA-256, reducing manual file verification time by approximately 70%.
- Implemented a structured reporting system (CSV/JSON) that increased the accuracy of detection for known threats by eliminating human error during signature matching.
- **Tech Used:** Python, Hashlib, Malware Signature Database, File Handling, Automation Scripts.

Attendance Management System | ***GitHub*** | Nov' 24- Feb' 25

- Built a real-time face detection system utilizing OpenCV and LBPH that maintains an accuracy rate of 95%+ under consistent lighting conditions.
- Designed a high-performance dataset creation module capable of capturing and processing 50+ facial images per user for model training.
- Automated attendance logging into CSV/XLS formats, reducing manual entry time from minutes to milliseconds per person.
- **Tech Used:** Python, OpenCV, Kivy, NumPy, Pandas, Haar Cascade, LBPH Face Recognizer, Multi-threading.

TRAINING

CipherSchools | Certificate | Jun' 25 – Jul' 25
Cyber Security

- Completed practical Cyber Security training focused on security fundamentals, vulnerability analysis, ethical hacking basics, and real-world threat identification.
- **Tech stacks used**: Linux (Kali/Ubuntu), Wireshark, Nmap, Burp Suite, Metasploit, OWASP Top 10, Virtual Machines (VMware/VirtualBox), Python scripting.

VPRO INFOTECH | Certificate | Jul' 23 – Aug' 23
Web Development

- Completed hands-on Web Development training covering frontend and backend fundamentals, responsive UI design, API integration, and building dynamic, real-world web applications.
- **Tech stacks used**: HTML, CSS, JavaScript, Bootstrap, MySQL, Git & GitHub.

CERTIFICATES

Infosys |Computational Theory: Language Principle & Finite Automata Theory| Infosys| Aug' 25

NPTEL |Privacy & Security in Online Social Media| NPTEL| Apr' 25

Neo Colab |Data Structures and Algorithms| Neo Colab| Dec' 24

ACHIEVEMENTS

- **Solved 150+ Leet Code Problems:**
  Strengthening expertise in data structures, algorithms, and logical problem-solving.
- **Attained 3rd position in PSBTE:**
  Ranked 3rd across the state in Diploma - Information Technology (Punjab State Board of Technical Education).

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.5** Aug' 24 – Present

SRS Government Polytechnic College for Girls Ludhiana, Punjab
Diploma – Information Technology; **Percentage: 90%** Aug' 21 – Jun' 24

Children Valley Public Sr. Sec. School Ludhiana, Punjab
Matriculation; **Percentage: 100%** Apr' 20 – Mar' 21
